

Data Scientist

£35,000 - £60,000 depending on experience

Bitweave provide data engineering and software solutions for large scale data analysis.

We are looking to expand our team with a data scientist.

What you will do:

You will work within a small cross-functional Agile engineering team designing and building software systems for curating, processing, and analysing large volumes of data.

You will use your expertise in data analysis, statistics and machine learning to develop analytics to model and analyse large volumes of data.

You will be comfortable working remotely as part of a distributed Agile team and be able to work independently to deliver high-quality solutions.

Your skills:

- Applied mathematics and statistics
- Data engineering
- Python programming
- Data visualisation
- Machine learning tools and techniques
- An understanding of cloud computing and system scaling
- Working with big data
- An analytical mind and a passion for problem solving
- Some experience or knowledge of the cyber security domain would be advantageous
- Excellent written and verbal communication skills

What we offer:

- Competitive salary, with yearly salary reviews
- Flexi-leave scheme: We believe it's important for all employees to have a healthy work-life balance
- 28 days holiday, including bank holidays, plus your birthday off every year
- Continuous funded online learning
- Remote working, taking away that daily commute
- Employee perks: from freebies to discounts to 24/7 access to a private GP
- Home broadband bill paid by us
- The latest Apple tech to help you get the job done

Note: Baseline Personnel Security Standard (BPSS) clearance is required and must be maintained for this role.

This role requires you to be a British Citizen (either born in the UK or naturalised) and be living in the UK.
